

## THE CONSORTIUM

## CONTACTS

**COOPERATIVE  
ROBOTICS**

**POWERED BY  
AI AND DATA**

**FOR FLEXIBLE  
PRODUCTION CELLS**

Funded by  
the European Union

## OUR VISION

**COROB aims to develop a flexible, cooperative and intelligent multi-robotic solution for arc welding-based manufacturing processes (joining and additive manufacturing), to offer new operational capabilities that allow to increase the efficiency and improve the flexibility of industrial processes.**

COROB, conceived as a global solution, will employ a cooperative multi-robot system powered by Inspection, Monitoring, Control and AI techniques to optimize the welding process, and the adjacent manufacturing stages for time, cost, energy, and resource reduction.

The data generated will be processed in a data acquisition platform to feed the AI technologies, addressing optimisation, search, planning, and analysis, ensuring AI robustness and trustworthiness.

The flexible solution will be validated in 2 semi-industrial pilots for automotive sector (Multi-robot cooperative arc welding) and toolmaking industry (Multi-robot cell for tooling repair using WAAM).

## OPEN CALLS

The purpose of the Open Call is to integrate and test innovative solutions within the COROB project's framework. This initiative aims to enhance the efficiency and flexibility of arc welding-based manufacturing processes by employing a cooperative multi-robot system powered by Inspection, Monitoring, Control, and AI techniques.

Scan to learn more about the open call opportunities

### 1<sup>st</sup> Funding Instrument:

150 000 €

#### SOLUTION TO CHALLENGES

Integration and testing of innovative technologies to add new capabilities on top of the project use cases.

**Type of applicants:** Single applicants. Technology developers and integrators, SMEs and Start-ups.

### 2<sup>nd</sup> Funding Instrument:

100 000 €

#### EXPERIMENTS FOR ENABLING TECHNOLOGIES FOR DIGITAL SERVICE

Integration and test innovative enabling technology to provide a digital service applicable in the project use cases.

**Type of applicants:** Single applicants. Technology developers and integrators, SMEs and Start-ups.
